**Project Description** (attach additional pages if necessary)

This Project consists of a new 4,295 SF single story addition to the existing library on the adjacent property. The building is a steel frame structure with concrete block shear walls. There are three distinct volumes added to the existing building: a small unconditioned storage shed, a new Young Adult area spatially contiguous with the existing library, and a new Multipurpose room and Courtyard adjacent to the existing reading room. A new roof and entry canopy ties all new construction together to the existing library. The exterior includes new precast concrete pavers on concrete slab at the existing library entry and the new Multipurpose Room entry. This finish continues to the interior and clads the ramp through the Courtyard. There is also a precast paver-clad concrete slab in Rear Yard terrace. A metal mesh fence encloses the Rear Yard, which is landscaped with plantings, gravel pavement and a new tree. Five new street trees will be added, along with enlarging the existing street trees. The existing flagpole and bike racks will be re-installed, along with the existing pin letter sign. A new aluminum sign will be added to the exterior of the storage shed, and new markings will be added to the glass doors and sidelights.

**M/WBE Participation Goals for Services**

Enter the percentage amount for each group or for an unspecified goal. Please note that there are no goals for Asian Americans in Professional Services

Prime Contract Industry: Construction

Group	Percentage	
<u>Unspecified *</u>	<u>25</u>	<u>%</u>
OR
