Project Description (attach additional pages if necessary)

This project consists of the implementation of a building-wide energy efficiency retrofit of the existing building systems and sub-systems that use energy and/or impact energy consumption, including but not limited to electrical, HVAC systems and the installation of energy meters and data-gathering equipment in various agency buildings in order to implement the Energy Conservation Measures (ECM's) identified in the "Energy Conservation Scopes" and in the "Commissioning Agent Energy Audit & Retro-Commissioning Reports" prepared and certified by the Commissioning Agent. The goal is to meet the Energy Audit requirements of Local Law 87-2009 of New York City. Replacement of the existing chiller plant, including new chillers, cooling towers, pumps, chemical treatment, water filter, associated piping and accessories.
